

EGYPTIAN SINAI SOLAR SALT

Technical Data Sheet | Washed & Dried Crystals | Bulk Export Supply

TAS Flowrance presents Egyptian Sinai solar salt for international importers, processors, distributors and procurement teams. The material is positioned for textile dyeing, leather processing, water treatment, selected personal-care formulations and other industrial applications, subject to the buyer's required standard, final COA and commercial offer.

PRODUCT OVERVIEW

Clean white solar salt for industrial and processing buyers.

Commercial discussions should confirm required NaCl purity, sulfate limit, moisture, crystal size, packing, destination port, end use and documentation before quotation.

Product form: washed and dried white salt crystals.

Origin: Egypt.

QUICK TECHNICAL PROFILE

Buyer-screening specification snapshot

98.5-99.3%	< 1%	< 0.5%	Washed & Dried
NaCl purity reference	Moisture	Sulfate SO4	Crystal form

APPLICATIONS

Primary buyer applications

Textile Dyeing Solar salt can support dyeing operations where purity, crystal condition and process consistency are specified by the buyer.	Leather Processing Salt can support hide preservation and selected tanning-process requirements according to the required industrial grade.
Water Treatment High-purity salt can be reviewed for water softening and ion-exchange regeneration systems.	Processing & Personal Care Clean crystalline salt may be considered for selected processing and mineral-based formulations subject to required standards and approvals.

BUYER NOTE: This document does not certify food, cosmetic, pharmaceutical or any other regulated grade. Final suitability depends on the buyer's specification, required approvals, current COA, approved sample and final commercial offer.

TECHNICAL SPECIFICATIONS

Egyptian Sinai Solar Salt - reference data

The following values are prepared for buyer screening and commercial discussion. Final contractual values, crystal-size distribution, tolerances and acceptance criteria must be confirmed in the current COA and final offer.

Parameter	Reference value	Buyer review note
Product	Natural Solar Salt	Egyptian-origin solar salt supply.
NaCl Purity	98.5-99.3%	Confirm final lot value by COA.
Moisture	< 1%	Confirm storage and process tolerance.
Sulfate Content SO ₄	< 0.5%	Relevant for process-sensitive applications.
Appearance	Bright clean white crystalline	Natural appearance can vary slightly by lot.
Form	Washed and dried crystals	Final crystal condition subject to order.
Particle Size	Subject to buyer requirement and final COA	Buyer should state the required crystal-size range.
Origin	Egypt	Export supply discussion through TAS Flowrance.

PACKING & EXPORT

Order details required before quotation

Packing can include bulk shipment, jumbo bags, 50 KG bags or buyer-required packing according to crystal size, order volume, handling method and destination.

FOB, CFR or CIF can be discussed according to order size, destination port, freight conditions and final quotation.

Export documents: COA, commercial invoice, packing list, certificate of origin and bill of lading can be discussed according to shipment terms and buyer instructions.

RFQ CHECKLIST

Information buyers should send

• Required solar salt grade and intended application.	• Required NaCl purity, moisture and sulfate limits.
• Required crystal size, appearance or processing condition.	• Quantity, delivery schedule and preferred packing.
• Destination country, destination port and Incoterm.	• Required COA values, inspection, sampling or certifications.
